

XR Animator to Encoder to OSCGroups to Decoder to Godot

Validate VMC-to-Bunraku encoding, network transport, Bunraku-to-VMC decoding, and rendering.

PASS SIGNALS

- Encoder sent and decoder sent continually increase
- Encoder dropped = 0; decoder rejected = 0
- Godot remains responsive for at least 60 seconds

PORT NOTE Separate local ports 39537, 39538, and 39539 prevent UDP binding conflicts on one Mac.
