

XR Animator to Encoder to OSCGroups to SuperCollider to Decoder to Godot

Validate the complete live capture, transport, SuperCollider processing, reconstruction, and render chain.

PASS SIGNALS

- OK Encoder and decoder sent counters continually increase
- OK SC frame count rises; missing frame count remains zero
- OK Dropped and rejected remain zero; motion stays responsive

PORT NOTE Decoder input 39537 avoids collision with encoder 39538 and SuperCollider 57130.
